What's New at Sun Microstamping

Well 2009 has been quite a year so far. There has been an abundance of changes over the course of this year at Sun Microstamping Technologies. So to keep our valued customers informed we have created a monthly Newsletter. The first edition of the Sun Newsletter will be uploaded to our website and sent out via e-mail on August 3rd. If you would like to enroll to receive our Newsletter please visit our website.

We would like to introduce all our customers to our new and improved website. Please visit our site at www.sunmicrostamping.com to find out more about Sun Microstamping or to receive a Quote. The Site features a Company Profile, a description of Primary and Support Processes at Sun, a synopsis of

the Industries Sun supplies, photo gallery of products and an interactive page - 'Around the Sun' to keep everyone up to date with the latest changes and successes at Sun. This is the first step of our website launch and in the future we will be moving towards making our site more interactive to better serve our customers.

Sun has made some structural and operational changes to stay competitive in this volatile market. The changes we have made to lower our overhead and make our operations leaner have improved Sun's productivity and our ability to serve our customers efficiently. In the Clearwater facility we have redesigned our Metal Stamping Shop floor to incorporate new machinery for new programs we

have won. During the last year and a half we have been working hard to diversify our business even more to ensure our customers are more evenly dispersed over the Industries we serve. Sun has been working hard to keep our current customers satisfied and to win new business. We have a larger outside Sales Force than ever.

This section of our website and Newsletter will be updated monthly, so stay tuned to learn more about life at Sun Microstamping Technologies.

News From Matamoros, Mexico

At the Matamoros, Mexico Division of Sun Microstamping Technologies we serve customers worldwide and have become a respected part of our local business community. We have established a reputation for proudly serving our customers with integrity and true customer service. Couple that with flexibility, quality and competitive prices and it is no surprise that Sun has a very

loyal customer base. We continue to add additional equipment and capabilities to better serve our current and future customers with world-class quality (single digit PPMs) and delivery from our TS-16949 certified facility. We have recently expanded our Molding Machine capabilities; our machine sizes range from 27-350 tons of clamp force. Other recent additions include a Closed

Loop Liquid Chiller System and value added plastic decoration to better serve the Automotive and Medical Industries. Even with the current world economic downturn, Sun continues to see rapid growth and a very bright future by supporting our customer's needs on a daily basis.

Welcome New Customer and Programs

At Sun we believe that our customers are the cornerstone of our success. We strive to be a dependable supplier that adds value to our customer's business. Due to the increase in market coverage Sun is seeing a dramatic increase in RFQ's (Request for Quotes) in the Medical, Industrial Equipment and White Goods sectors.

We would like to welcome all our new customers and thank you for giving us the opportunity to add value to your business and improve your competitive advantage. Also, in these turbulent times we would like to thank our older customers for sticking with us and for trusting us with new programs. At Sun we take customer service

and satisfaction seriously and we apply our company values of Respect, Precision and Accountability throughout every aspect of our business.

Letter from the CEO

"We are perhaps not at the beginning of the end but at the end of the beginning!"
Winston Churchill

2009 started off bad and got worse! Sun like every company associated with the North American Automotive Market has had a torrid time for the last nine months. It seems like things are beginning to improve, bookings are increasing; there are signs of life. However, as Winston Churchill once said "We are perhaps not at the beginning of the end but at the end of the beginning!"

Once again in common with everyone that has survived the economic down turn Sun has had to reduce its

costs at the same time as improving its efficiency. The most important goal during this restructuring was to retain and keep motivated the staff members who are the core competencies of the Company.

Companies like Sun that are owned by the Management team have distinct advantage over companies with a corporate structure. We know how "lean" we can go without destroying our intellectual property; we do not have to meet corporate targets. Consequently, as we rebound Sun has been able to

preserve our "A Team". This has ensured that we have not only survived but we have improved and thus will flourish in the years to come.

Trade Show Attendance

This past year Sun Microstamping Technologies has been putting in a global presence on the Trade Show circuit. By the end of 2009 and we will have exhibited and attended over ten trade shows this year.

At the end of 2008 we kicked off our trade show marketing push with an international show that attracted visitors from over thirty-five countries across the Globe.

We exhibited in Munich Germany at the first annual Hybridica Trade Show that ran in conjunction with Electronica. The two shows together created perfect synergy for Injection Molding and Electronic Sectors. We viewed this show as a success and enjoyed taking part in the first Hybrid Component show that featured components made of metal and plastic which is an area

Sun specializes in.

In the domestic Trade Show arena we kicked off the spring of 2009 by exhibiting at the AmCon Series in Chantilly, VA; Dallas, TX and Minneapolis, MN. The AmCon series is a Contract Manufacturing Expo that features contract manufacturers that provide custom metal, plastic, rubber, electronic parts and finishing services to OEM's.

*Come Visit
Sun at one of
the many
Trade Show
we are
attending this
year !*

So far we have obtained excellent contacts and results from our trade show presence.

In the fall we will be exhibiting at the AmCon Series in;

- Nashville, TN
September 15-16th, 2009
- Charlotte, NC
October 6-8th, 2009
- Grand Rapids, MI
October 21st-22nd, 2009

facturing (MD&M) Trade shows in New York and Los Angeles.

Check out our website for up to date Trade Show dates and more information about the shows at

www.sunmicrostamping.com

Come and visit us at the Shows.

We have also attended Medical Design and Manu-

Welcome New Sales Representatives

Sun Microstamping Technologies has recently increased their Field Sales Force to better serve our customers and to create more business with new clients. This increased sales force is allowing Sun to cover a larger geographic area. We hope to continue our sales force growth over the next year to come, both domestically and internationally.

So we would like to give a warm welcome to our new Sales Representatives and thank our seasoned Sales Representatives for their continued hard work and dedication to Sun Microstamping.

We look forward to working with you all in the years to come!

Sun's Future is Bright

With the worst part of 2009 behind us, we believe our future is bright at Sun. We are not claiming to see the light at the end of the tunnel yet. However, we are feeling stronger than ever as a Business, striving to constantly adapt our business to this volatile market. The changes Sun has made throughout this recession has made our business stronger.

We invite you to read our monthly newsletter to follow Sun and the Industry's success, struggles and innovations. Thank you to all our customers for your support and giving us the opportunity to serve you as we work together to survive and flourish in this recession.

Here's to the future of our Industry, may we grow together.
